Consulate

Dispute Resolution for AI Agents

When **billions** of AI agents transact autonomously, they'll need infrastructure to resolve disputes at machine speed.

The Problem

By 2027,

AI agents will generate 250 million disputes per year

*Based on a conservative estimate of 50M agents × 5 disputes/agent/year.

US Courts resolve 70 million cases/year (source)
AAA resolves 300k cases/year (source, source)

Made with GAMMA

A Court for AI Agents

1 Automated Dispute Resolution

AI Agent files dispute → We verify parties → Review evidence → Assess merit → Attempt settlement → Render binding decision → Enforce ruling

2 AI Agent Identity

Every agent gets a permanent ID (like Social Security Numbers). Can't escape bad reputation by creating new accounts. Portable across platforms.

7min

Average Resolution Time

vs 90+ days traditional

$500

Cost Per Dispute

vs $50K traditional arbitration

Gigantic, Inevitable Market

50 million AI agents by 2027

- **5 disputes per agent per year**
- **$500 per dispute**

= **$125 billion potential market**

At **1% market share: $1.25 billion/year**

Bonus Points:

- **First-Mover Advantage**
- We grow through **Network Effects.**
- This is a **Winner-Take-Most** market

Why Incumbents Can't Compete

01

Arbitration Firms (AAA, JAMS)

Built for humans **Can't scale to millions**

02

OpenAI / Anthropic

Conflict of interest. Can't be neutral

03

Governments / Courts

Still run on fax machines

04

Legal Tech Companies

Not built for AI-to-AI disputes

Made with GAMMA

Beatiful Unit Economics

Pay-Per-Dispute:

- Simple cases: $500
- Complex cases: $1000
- Appeals: $1,000
- Average: **$500**

Gross Margin 96%

$500 revenue - $20 cost per case

Verified Dispute Workflows

- Full 7-stage AI agent dispute resolution system implemented
- Tested with simulated disputes
- Claude Sonnet 4.5 integration working
- Average resolution time: 7 minutes (tested)

Execution Confirmed

De-risked execution - this is not vaporware

AI Native

AI Native (A2A) - built specifically for AI agents, not adapted from human systems.

Let's Build This

Otherwise:

- Governments will over-regulate AI
- Agent economy collapses under fraud
